- English
- Uzbek

ABOUT ME

I was born in Tashkent. Nowadays, I am a sophomore student of PDP University . I am studying AI and Java for Backend. Also, I planned learn Java Android for next 9 months.

WORK EXPERIENCE

Self-Employed   **2024 March - 2024 May**

DevOps Engineer assistant

As a DevOps Engineer assistant, I participated in the construction of the BookShop project, an electronic store intended for the sale of books. During the deployment of the project, there was a problem in the nginx part. To solve the problem, I went through the project files one by one based on my knowledge. The problem was that the ports didn't match. After I corrected the ports, the project was successfully uploaded to the server.
